Advantages and Disadvantages

Advantages

Disadvantages

Advantages and Disadvantages

Advantages

- Sprints : quick adaption, flexibility

Disadvantages

Advantages and Disadvantages

Advantages

- Sprints : quick adaption, flexibility
- Meetings : daily update

Disadvantages

Advantages and Disadvantages

Advantages

- Sprints : quick adaption, flexibility
- Meetings : daily update
- More responsibility, higher productivity

Disadvantages

Advantages and Disadvantages

Advantages

- Sprints : quick adaption, flexibility
- Meetings : daily update
- More responsibility, higher productivity
- Increase in customer satisfaction

Disadvantages

Advantages and Disadvantages

Advantages

- Sprints : quick adaption, flexibility
- Meetings : daily update
- More responsibility, higher productivity
- Increase in customer satisfaction

Disadvantages

- Effectiveness depends on the team

Advantages and Disadvantages

Advantages

- Sprints : quick adaption, flexibility
- Meetings : daily update
- More responsibility, higher productivity
- Increase in customer satisfaction

Disadvantages

- Effectiveness depends on the team
- Members not experienced : Project tends to fail

Advantages and Disadvantages

Advantages

- Sprints : quick adaption, flexibility
- Meetings : daily update
- More responsibility, higher productivity
- Increase in customer satisfaction

Disadvantages

- Effectiveness depends on the team
- Members not experienced : Project tends to fail
- Daily meetings are excessive

Advantages and Disadvantages

Advantages

- Sprints : quick adaption, flexibility
- Meetings : daily update
- More responsibility, higher productivity
- Increase in customer satisfaction

Disadvantages

- Effectiveness depends on the team
- Members not experienced : Project tends to fail
- Daily meetings are excessive
- Method can be difficult to apply

Scrum and GitHub

Scrum

- Working in a team
  - → same files
  - → overview of everything
  - → Scrum Master

GitHub

Scrum and GitHub

Scrum

- Working in a team
  → same files
  → overview of everything
  → Scrum Master

GitHub

- Repository
  → where the project lives in
  → commits

Scrum and GitHub
